

## **Available Business Assistance Programs**

### **Energy Programs**

#### **ComEd Energy Efficiency Program**

The ComEd Energy Efficiency Program is about improving the value you receive from your electric energy dollars and in the process, saving money and protecting the environment. ComEd has programs to fit a variety of business needs, from small business to heavy industrial. Whether you are just starting out and need input on construction, or are seeking incentives for building optimization or equipment, visit <https://www.comed.com/WaysToSave/ForYourBusiness> for more information before you begin.

#### **Nicor Energy Smart Program**

Nicor offers a variety of incentives to improve efficiency and generate savings through the [Energy Smart Program](#). The program includes assessments, rebates, free products, and even custom incentive programs designed around energy savings.

#### **Smart Energy Design Assistance (SEDAC)**

Provides technical assistance services through the Smart Energy Design Assistance Center ([SEDAC](#)), which is staffed with engineers and energy professionals from the University of Illinois at Urbana-Champaign, School of Architecture. SEDAC provides free technical assistance services to businesses, state and local government facilities, public schools, community colleges, universities and colleges to assist clients who are considering energy efficiency improvements at existing facilities or to enhance baseline design of new facilities.

SEDAC services include free technical design assistance services, education and training, information on Illinois building energy codes, and a network of energy service providers

Contact [Doug Pryor, Vice President of Economic Development](#), to learn more about incentives available to you through state, county or local programs focused on businesses growth and job creation.
